

Miroslav Pinak

Head of Radiation Safety & Monitoring Section within the Division of Radiation, Transport and Waste Safety at the Department of Nuclear Safety & Security

International Atomic Energy Agency, Austria

Dr Pinak has been Head of Radiation Safety and Monitoring Section of the International Atomic Energy Agency since 2012.

His current role involves development and implementation of the IAEA's policy and programme on specific aspects of radiation protection, the radiological protection of patients, and the radiological protection of workers. Previously he has been associated with the OECD Nuclear Energy Agency (NEA), Radiological Protection and Radioactive Waste Management Division, Paris, France; Japan Atomic Energy Agency, (Environment and Radiation Engineering Unit), Tokai, Japan; Comenius University, The Faculty of Mathematics, Physics and Informatics, Bratislava, Slovakia; and the Czechoslovak Academy of Sciences, and Institute of Radiation Dosimetry, Prague, Czechoslovakia.

Dr Pinak studied Nuclear Energy at the Czech Technical University, Faculty of Nuclear & Physical Engineering, Department of Dosimetry and Application of Ionizing Radiation, Prague, former Czechoslovakia completing his degree in 1985. He became a Doctor of Engineering (PhD) at University on Tokyo, Japan in 1994.
